

Whitfield Farm

Organics

**Grass Fed Beef
reared naturally**

**We are different from other beef producers.
We do not feed our cattle concentrates of any
kind.**

**Our cattle are fed entirely on grass, this
alters the taste of the meat dramatically as the
animals are allowed to fatten and
develop at their own natural rate. The purely
grass fed meat contains higher
percentages of omega-3 than grain fed beef.**

It is good for you.

**Once concentrates are fed, the omega-3
content of the meat dramatically falls. It is the
omega-3 content and our natural
rearing process which gives our meat its
distinctive and rich taste.**

**“The meat is beautifully tender and I am
delighted to have found a beef producer of this
quality”**

Mrs. B. North Somerset

www.whitfieldfarmorganics.co.uk

**Our meat is hung traditionally for a
minimum of three weeks to give flavour
and texture
and vacuum packed for
freshness.**
